

# SOLAR POWER HOUR

## FREE INFORMATION SESSIONS

### Solar Power Hours

The Midwest Renewable Energy Association (MREA) works with community partners to offer FREE one-hour seminars to the public. Learn how solar PV systems work, are installed and identify financial incentives and benefits.

### Community Partnerships

The MREA works with municipalities and community organizations to facilitate public communication and education. We also work with approved contractors, suppliers, local manufacturers, and local lenders to ensure that homes, businesses, and municipalities have access to regionally manufactured solar products, as well as low-interest financing through community banks and credit unions.

### Our Team

To further facilitate interest, the MREA in Minnesota is working with 6 installers and 2 distributors that meet our standards for experience, credentialing, and customer relations. These organizations offer a 5% discount on labor and materials as well as free site assessments and financing options.

### Request A Solar Power Hour

The MREA is always looking for organizations, municipalities, and companies that are interested in Solar. Let us set a Solar Power Hour up in your town, space, or business. For more information and to schedule a Solar Power Hour contact Dathan Lythgoe.
