

Fall 2015 MREA Courses

The MREA offers a variety of courses in solar electricity (PV), solar thermal heating, and small wind energy systems. We have courses for all levels of learning, from the novice to the industry professional. Courses are available throughout the Midwest and many are accessible online.

July

Introduction to Wind Systems (W 101.02) Online

- July 27-August 23
- Self-paced with optional, recorded webinars

August

Solar Thermal Site Assessor Training (ST 201.01) Online

- August 3-30
- Self-paced with optional, recorded webinars

PV Site Assessor Training (ST 201.04) Online

- August 10-September 7
- Self-paced with optional, recorded webinars

Basic Photovoltaics (PV 101.03) Online

- August 31-September 27
- Self-paced with optional, recorded webinars

Batteries in Solar PV Systems (Online)

- August 31-October 9
- Approved for 12 NABCEP CECs
- Offered in partnership with HeatSpring

September

Introduction to Tower Climbing and Safety (W 307.02)

- Tuesday, September 8
- Custer, WI

Wind Turbine Repair and Maintenance (W 401.01)

- September 9-10
- Custer, WI

Building Energy Analytics: Measuring & Understanding Building Energy Use (Online)

- September 14-October 23
- Offered in partnership with NESEA

Deep Energy Retrofits (Online)

- September 14-November 20
- Offered in partnership with NESEA

Passive House in the Real World (Online)

- September 14-October 9
- Offered in partnership with NESEA

PV System Design (PV 202.03) Online

- September 21-November 15
- Self-paced with optional, recorded webinars
- Approved for 14 NABCEP CECs

Solar Domestic Hot Water Systems (ST 101.02) Online

- September 28-October 25
- Self-paced with optional, recorded webinars

October

PV Site Assessor Training (PV 201.03) Online

- October 5-November 1
- Self-paced with optional, recorded webinars

Small Wind Site Assessor Training (W 201.02) Online

- October 12-November 8
- Self-paced with optional, recorded webinars

Solar Space Heating Systems (ST 409.01)

- Saturday, October 17
- Custer, WI

November

PV Sales and Finance (PV 203.02) Online

- November 9-December 13
- Self-paced with optional, recorded webinars
- Approved for 7 NABCEP CECs

Basic Photovoltaics (PV 101.04) Online

- November 16-December 20
- Self-paced with optional, recorded webinars

Visit www.midwestrenew.org/courses for course offering details and registration.

Solar Training Academy

In 2016, the Solar Academy will return with courses running one weekend per month, January through May, in Milwaukee, the Twin Cities, and Normal, IL.

Online, On-Demand Courses

We have seven online, informational courses that are completely self-paced and available at any time. Best of all, they're FREE for MREA members and only \$20 for non-members!

- Introduction to Renewable Energy
- Solar Electricity
- Solar Water Heating
- Trends in Solar Energy Marketplace
- Understanding Stray Voltage
- Wind Electricity
- Working with Electricity
