

Solar Twin Cities 2.0

SOLAR GROUP BUY PROGRAM

Homeowners and businesses across the Twin Cities come take advantage of Solar Twin Cities 2.0, a solar group buy program designed to help lower the cost of going solar! Our informational sessions teach the basics of solar, its financial implications, and how this group buy program lowers the cost of solar ownership.

The Midwest Renewable Energy Association, TruNorth Solar, and the Center for Energy and Environment will share ways to reduce energy costs, how to get your home or business's solar potential assessed, and help answer "is now the right time to go solar?"

Come to one of our Solar Power Hours this summer to get started on your path to solar!
